### Water, A gift to thirsty people in Kenya

Thanks to the sharing of your blessings, water is flowing abundantly in Kaswanga, Kenya.

In July two wells were drilled to replace the windmill system that required frequent repairs and often was non-There is a 35 functional. foot deep well for the community and a well that is designated exclusively for the Living Waters Feeding Center. This well is 190 feet deep, operated by a solar powered submersible pump and provides enough water to fill 55,000 liters of stored water.

This provides virtually unlimited water for the feeding center and the two and one half acre garden that is now

planted and will soon provide enough fruits and vegetables to all 200 orphaned children.

My friends, it is in God's plan to have His disadvantaged children in Kaswanga have pure, flowing water. He has blessed those more fortunate to help make this a reality.

Solar power for well

### Living Waters Feeding Center feeding 135 orphan children every weekday

The feeding center has been fully operational for one year. 135 orphan children and a few widows currently receive meals which consist of maize and beans, beans and rice or beans and vegetables. Fruit is offered one day a week until more fruit production becomes available.

The gaunt, frightened and frail orphan children of Kaswanga are not so prevalent as now they are healthy, happy and strong. Each child would like to thank the dedicated donors for making a difference in their life
